I. Neimark, Yu. I.

Trans. of Akademiya Nauk SSSR (Doklady) 1959,
v. 127, no. 5, p. 961-964.

DESCRIPTORS: Control systems, *Stability, Motion,
*Linear systems, Mathematical analysis, Integral
equations.

The present study is concerned with linearization, when
the stability of the solutions of certain distributed sys-
tems, which are described by differential equations
with lagging arguments, is being investigated. We also
consider equations involving partial derivatives which
are related to systems of automatic regulation with
uniformly distributed elements (lags, pipe-lines fric-
tion, long line impedance, etc). The proof of the
